ORGANIZACION DE AVIACION CIVIL INTERNACIONAL
МЕЖДУНАРОДНАЯ ОРГАНІЗАЦІЯ ГРАЖДАНСКОЇ АВІАЦІЇ**

Approved by the Secretary General of the International Civil Aviation Organization and published under his authority

Approuvé par le Secrétaire général de l'Organisation de l'Aviation civile internationale et publié sous son autorité.

Aprobado por el Secretario General de la Organización de Aviación Civil Internacional y publicado bajo su responsabilidad.

Утвержден Генеральным секретарем Международной организации гражданской авиации и опубликован с его санкции.

Recipients of ICAO Digests of Statistics are invited to give their views, comments and suggestions on these Digests. Your observations, whether on matters of principle or on small detail, will materially assist this Organization in its attempts to increase the usefulness of the Digests of Statistics to national aviation administrations, airline companies and readers in general. Please direct your correspondence to the Secretary General of ICAO, 1000 Sherbrooke Street West, Suite 400, Montreal, Quebec, Canada H3A 2R2 (Attention: Statistics Section).

Les destinataires des Recueils de statistiques de l'OACI sont invités à présenter leurs observations, commentaires et suggestions au sujet de ces recueils. Ces observations, qu'elles portent sur des questions de principe ou sur des points de détail, apporteront une aide appréciable à l'Organisation dans ses efforts en vue d'accroître l'utilité des recueils de statistiques pour les administrations aéronautiques nationales, les entreprises de transport aérien et tous les lecteurs en général. Prière d'adresser la correspondance au Secrétaire général de l'OACI, 1000 ouest, rue Sherbrooke, bureau 400, Montréal, Québec, Canada H3A 2R2 (Section des statistiques).

Poseedores de Compendios Estadísticos: se les ruega que expresen sus puntos de vista, comentarios y sugerencias sobre estos compendios. Sus observaciones, tanto si son respecto a puntos de principio, como a pequeños detalles, ayudarán materialmente a esta Organización en sus esfuerzos a fin de aumentar la utilidad de los compendios estadísticos para las administraciones nacionales de aviación, compañías de transporte aéreo y los lectores en general. La correspondencia debe dirigirse al Secretario General de la OACI, 1000 Sherbrooke Street West, Oficina 400, Montreal, Quebec, Canada H3A 2R2 (Atención de la Sección de Estadística).

Получателям статистических сборников ИКАО предлагается представить мнения, комментарии и предложения по данным сборникам. Ваши замечания как по принципиальным вопросам, так и в отношении мелких деталей окажут Организации существенную помощь в ее стремлении сделать статистические сборники более полезными для администраций по делам авиации различных стран, авиакомпаний и для широкого читателя. Пожалуйста, направляйте Ваши письма Генеральному секретарю ИКАО по адресу: 1000 Sherbrooke Street West, Suite 400, Montreal, Quebec, Canada H3A 2R2 (Attention: Statistics Section).

INTRODUCTIONGENERAL

1. The first part (white pages) of this Digest of On-Flight Origin and Destination (OFOD) contains statistics for the fourth quarter of 1986, and the second part (yellow pages) contains statistics for the 12 month period ending 31 December 1986. In the period 1977-1981, the OFOD data were collected on an experimental basis, for the selected months of March, June, September and December. Beginning with 1982, the data have been collected and published on a quarterly basis with each issue containing aggregated data for the three months of a quarter.

PROTECTING CONFIDENTIALITY

2. Statistics published in this Digest were reported to ICAO on the Air Transport Reporting Form B (On-Flight Origin and Destination), which is reproduced on pages IV and V. The ICAO Council has directed that the data reported on this Form for each State and each airline shall be kept confidential by ICAO and that only statistics which do not reveal the traffic of individual States or airlines will be published or released by ICAO. The practical consequence of this policy is that no statistics for a city-pair are published in this Digest (or otherwise made available) unless at least two airlines representing two different States have reported.

CONTENTS OF DIGEST

3. This Digest of Statistics contains the revenue traffic performed by airlines on scheduled international services. The data have been reported in accordance with the definition of on-flight origin and destination traffic, as follows: the revenue traffic on a given flight (i.e., the operation of an aircraft on a stage or number of stages with an unchanging flight number) subdivided by city-pairs in accordance with the point of embarkation and point of disembarkation. The basis of organization of the data contained in this Digest is therefore the city-pair, which has been defined as "two cities between which travel is authorized by a passenger ticket or part of a ticket or between which shipments are made in accordance with a shipment document or a part of it (freight bill or mail delivery bill)".

4. Due to the confidentiality directive, the revenue traffic data shown for each city-pair is the combined total of the reporting airlines. These data consist of number of passengers and tonnes of freight and mail. Data for freight and mail tonnes are given to two decimal places. For further explanation as to how the data have been arranged, see the section "Presentation of the Data", paragraphs 8 to 11 of this Introduction.

5. For each city-pair, the airlines included in the revenue traffic totals are shown. For the fourth quarter of 1986, data for 120 international scheduled airlines from 81 Contracting States have been analyzed during the processing stages of this Digest. These airlines reported a total of 11 616 records or individual city-pairs linked by international scheduled services. Of this total, 5 629 records have been excluded because they were city-pairs reported by only one airline. The rest (5 987 records) were combined to account for the 2 341 city-pairs included in this Digest.

LANGUAGES

6. The table of contents (Page I), the introduction, the list of airline designators and the facsimile of the Air Transport Reporting Form B are given in English, French, Spanish and Russian in the blue section.

7. Table and column headings (as shown at the end of this Introduction) are given in the Digest tables in English only, but the equivalents in French, Spanish and Russian will be found at the end of the Introduction Section for each language (pages VII, XI and XV respectively).

PRESENTATION OF THE DATA

8. The information in the Digest is presented alphabetically by city-pair. Revenue traffic (passengers, freight and mail) is shown in the direction in which it was performed (for instance, to know the traffic in both directions between Rio de Janeiro-Tokyo, the total for Rio de Janeiro-Tokyo, appearing under R, should be added to that of Tokyo-Rio de Janeiro, appearing under T).

9. Due to space limitations, not more than fifteen letters are used for printing city names, but care has been taken to reflect in the fifteen letters the full name of the city. In general, if an abbreviated name is used for a city, this abbreviation occurs toward the end of the name, in order to give the city its right place in alphabetical order.

10. Within each city-pair, the airlines whose data have been included in the revenue traffic totals shown have been identified by the ICAO two-letter designators which are of general use in the aviation industry. An alphabetical list of these designators along with the airline abbreviation, airline full name, State of Registry and whether the airline has reported data for this period is given on page XVIII.

11. Notes and explanations of the statistical conventions and symbols used in ICAO Digests of Statistics are given on the inside back cover.

ON-FLIGHT ORIGIN AND DESTINATION

Scheduled Services (Revenue) - International Operations

Period:

CITY-PAIR	PASSENGERS (Number)	FREIGHT (Tonnes)	MAIL (Tonnes)	AIRLINES INCLUDED IN TOTALS
				Each airline reported all 3 traffic items unless a number follows the airline code: 1 - no passengers reported 2 - no freight reported 3 - no mail reported

FORM B

Remarks (including mention of any unavoidable deviation from instructions):

FORM B
(ON-FLIGHT ORIGIN AND DESTINATION)

REPORTING INSTRUCTIONS

FILING REQUIREMENTS

This Form is to be filed quarterly by ICAO Contracting States for all of their airlines providing international scheduled air services. Each Form should include aggregated data for the three months of a quarter. Reports should be transmitted to ICAO not later than two months after the end of the applicable reporting period.

NOTE: Form C entitled "Traffic by Flight Stage" is to be filed annually covering information of international scheduled air services by flight stage.

PROTECTING CONFIDENTIALITY

The ICAO Council has directed that the data reported on this Form for each State and each airline shall be kept confidential by ICAO and that only statistics which do not reveal the traffic of individual airlines will be published or released by ICAO.

Names of individual airlines should be given only at the top of each Form B filed and for computer listings airline name should be given only on the top of the first page of each listing.

In making this information to ICAO, it is recommended that reports be placed in a sealed envelope with the inscription "To be opened only by ICAO Traffic Flow Officer". This envelope can then be placed in an ordinary envelope and addressed to ICAO in the usual way.

STATISTICS TO BE REPORTED

Report on this Form the revenue traffic (passengers, freight, mail) carried between all international city-pairs connected by scheduled revenue services of the airlines registered in the reporting State. Revenue traffic for domestic city-pairs need not be reported.

NOTE: This reporting Form may be used in two ways. First, it may be used by a State to report the international service of one airline and this is preferred whenever possible (see Example A below). Second, if necessary, a State may use this Form to report the combined international traffic of several of its airlines. This requires a different reporting procedure which is described in the special instructions below:

Special Instructions for Forms Containing Combined Report for More than One Airline

On the right side of the upper part of the Form list the airlines included in the Form, so that a one-digit code number (1, 2, 3, etc.) is assigned to each airline (or States reporting on more than 4 airlines, a separate statement containing code numbers and airline names should be included). In Column e of the Form these code numbers should be indicated for each city-pair, so that it is possible to know which airlines are included in each combined total (see Example B below).

DESCRIPTION OF TERMS

On-Flight Origin and Destination Traffic - The revenue traffic on a given flight subdivided by city-pairs in accordance with point of embarkation and point of disembarkation. (When referring to passengers, "On-flight origin and destination statistics" may be considered as equivalent to "Coupon origin and destination statistics", which can be defined as "the point of embarkation and the point of disembarkation of the passenger covered by one flight coupon".)

City-Pair — Two cities between which travel is authorized by a passenger ticket or part of a ticket or between which shipments are made in accordance with a shipment document or a part of it (freight bill or mail delivery bill).

Flight — Flight is the operation of an aircraft on a stage or number of stages with an unchanging flight number. (Stage — the operation of an aircraft from take-off to its next landing.)

Flight Coupon — Each component part of a ticket containing separate travel authority for subdivisions of the total travel covered by the passenger ticket.

Revenue Scheduled Service — Revenue scheduled services are flights scheduled and performed for remuneration according to a published timetable, or so regular or frequent as to constitute a recognizably systematic series, which are open to use by members of the public; includes extra revenue flights occasioned by overflow traffic from scheduled flights.

COLUMNS

Statistics are to be reported in Columns a through e of this Report Form as follows

INTRODUCTIONGENERALITES

1. La première partie (pages blanches) du présent recueil de statistiques d'origine et de destination par vol (OFOD) contient les statistiques relatives au quatrième trimestre de 1986 et la seconde partie (pages jaunes) contient les statistiques correspondant à la période de 12 mois se terminant le 31 décembre 1986. Entre 1977 et 1981, les données OFOD ont été recueillies, à titre experimental, pour les mois de mars, juin, septembre et décembre. Depuis 1982, ces données sont recueillies et publiées sur une base trimestrielle, de sorte que chaque recueil contient des données globales pour les trois mois d'un trimestre.

PROTECTION DU CARACTERE CONFIDENTIEL DES DONNEES

2. Les statistiques publiées dans le présent recueil ont été communiquées à l'OACI au moyen du Formulaire B du transport aérien (Origine et destination par vol), qui est reproduit aux pages VIII et IX. Le Conseil de l'OACI a décidé que l'organisation préservera le caractère confidentiel des données communiquées au moyen de ce formulaire pour chaque Etat et pour chaque entreprise et qu'elle ne publiera ou ne communiquera que les statistiques qui ne dévoilent pas le trafic réalisé par chaque Etat et chaque entreprise. La conséquence pratique de cette politique est que les statistiques relatives à une paire de villes ne seront publiées dans le recueil (ou autrement diffusées) que si au moins deux entreprises représentant deux Etats différents les ont communiquées.

TENEUR DU RECUEIL

3. Le présent recueil de statistiques contient les données relatives au trafic payant réalisé par les entreprises sur leurs services internationaux réguliers. Les statistiques ont été communiquées de façon conforme à la définition du trafic d'origine et de destination par vol, comme suit: trafic payant sur un vol donné (c'est-à-dire le projet d'un aéronef sur une ou sur plusieurs étapes sans changement de numéro de vol), ventilé entre les différentes paires de villes d'après le point d'embarquement et le point de débarquement. La base du classement des données qui figurent dans le présent recueil est donc la paire de villes, qui a été définie comme "deux villes entre lesquelles un voyage est autorisé par un billet de passage, ou une partie de billet de passage, ou entre lesquelles des expéditions de passage, ou une partie de billet de passage, ou entre lesquelles des expéditions sont faites conformément à un document d'expédition, ou à une partie de document d'expédition (lettre de transport aérien ou bordereau de livraison de la poste).

4. En raison des instructions relatives au caractère confidentiel des données, les données sur le trafic payant qui se rapportent à chaque paire de villes représentent le total combiné des entreprises qui ont communiqué des renseignements. Ces données se composent du nombre de passagers et du nombre de tonnes de fret et de poste. Les données concernant le fret et la poste sont arrêtées à la deuxième décimale. Pour de plus amples explications concernant la manière dont les données sont présentées, voir la section "Présentation des données", aux paragraphes 8 à 11 de la présente introduction.

5. Pour chaque paire de villes, les entreprises comprises dans les totaux du trafic payant sont indiquées. Pour le quatrième trimestre de 1986, des données concernant 120 entreprises de transport aérien régulier international de 81 Etats contractants ont été analysées au cours des phases de traitement des statistiques du présent recueil. Ces entreprises totalisent 11 616 "entrées" ou paires de villes reliées par des services réguliers internationaux. Sur ce total, 5 629 entrées ont été exclues parce qu'il s'agissait de paires de villes indiquées par une seule entreprise. Le reste (5 987 entrées) a été combiné pour représenter les 2 341 paires de villes mentionnées dans le présent recueil.

LANGUES

6. La table des matières (page I), l'introduction, la liste des indicatifs des entreprises et le fac-similé du Formulaire B du transport aérien figurent en français, en anglais, en espagnol et en russe dans la section bleue.

7. Les titres des tableaux et les en-têtes des colonnes ne figurent qu'en anglais dans les tableaux du présent recueil, mais leurs équivalents en français sont donnés à la fin de l'introduction.

PRESENTATION DES DONNEES

8. Les renseignements du présent recueil sont présentés par ordre alphabétique d'après la paire de villes. Le trafic payant (passagers, fret et poste) est indiqué dans la direction où le service a été assuré (pour connaître, par exemple, le trafic dans les deux sens entre Rio de Janeiro et Tokyo, il faut additionner le total donné sous R pour Rio de Janeiro-Tokyo et celui donné sous T pour Tokyo-Rio de Janeiro).

9. Faute de place, il n'a pas été possible d'employer plus de quinze lettres pour imprimer les noms de villes, mais on a veillé à traduire par ces quinze lettres le nom complet de la ville. En général, si une abréviation est utilisée pour une ville, c'est la fin du nom qui a été abrégée, de manière que la ville puisse occuper la place qui lui revient dans l'ordre alphabétique.

10. Pour chaque paire de villes, les entreprises dont les données sont comprises dans les totaux indiqués pour le trafic payant sont identifiées par les indicatifs à deux lettres de l'OACI qui sont d'emploi général dans l'industrie aéronautique. On trouvera à la page XVIII la liste alphabétique de ces indicatifs, ainsi que l'abréviation du nom des entreprises, leur nom complet et le nom du pays où elles ont leur siège. Il y est aussi indiqué si l'entreprise a communiqué des données pour la période considérée.

11. Les notes et explications sur les conventions statistiques et les symboles utilisés dans les recueils de statistiques de l'OACI figurent à l'intérieur du dos de la couverture.

ORIGINE ET DESTINATIONS PAR VOL

Services réguliers (payants) - Trafic international

Période:

PAIRE DE VILLES	PASSAGERS (Nombre)	FRET (Tonnes)	POSTE (Tonnes)	ENTREPRISES DE TRANSPORT AERIEN COMPRISSES DANS LES TOTAUX

GENERALIDADES

1. La primera parte (páginas blancas) de este Compendio de estadísticas de origen y destino por vuelo (OFOD) contiene los datos correspondientes al cuarto trimestre de 1986, y la segunda parte (páginas amarillas) contiene las estadísticas correspondientes al periodo de doce meses que terminó el 31 de diciembre de 1986. En el periodo comprendido entre 1977 y 1981 se recopilaron, con carácter experimental, datos correspondientes a los meses seleccionados de marzo, junio, septiembre y diciembre. A partir de 1982 los datos se han recopilado y publicado trimestralmente, y cada edición contiene las estadísticas de los tres meses acumuladas.

MEDIDAS PARA GARANTIZAR EL CARACTER CONFIDENCIAL DE LOS DATOS

2. Las estadísticas que se publican en este Compendio se notificaban a la OACI por medio del Formulario B de información de transporte aéreo (origen y destino por vuelo), que se reproduce en las páginas XII y XIII. De conformidad con lo ordenado por el Consejo de la OACI, la Organización mantendrá en secreto los datos que se consignen en este formulario con respecto a cada Estado y a cada línea aérea, y sólo publicará o divulgará las estadísticas que no revelen el tráfico de cada Estado o de cada línea aérea por separado. La consecuencia práctica de esta medida será que en este Compendio no se publicarán, ni se divulgarán por otro medio, estadísticas de pares de ciudades, a menos que un mínimo de dos líneas aéreas representantes de dos Estados diferentes hayan notificado datos.

CONTENIDO DEL COMPENDIO

3. Este Compendio estadístico contiene datos sobre el tráfico de pago efectuado por las líneas aéreas en servicios internacionales regulares. Los datos se han notificado de acuerdo con la definición de tráfico de origen y destino por vuelo, como sigue: el tráfico de pago en un vuelo determinado (es decir, la operación de una aeronave durante una o varias etapas sin que cambie el número de vuelo), subdividido por pares de ciudades, de conformidad con los puntos de embarque y desembarque. Por lo tanto, la base de la organización de los datos contenidos en este Compendio es el par de ciudades, que se ha definido como "dos ciudades entre las cuales se está autorizado para viajar en virtud de un billete o de una parte de éste, o entre las que se efectúan envíos en virtud de un documento de expedición (carta de porte aéreo o planilla de entrega de los despachos) o de una parte de éste".

4. Debido al carácter confidencial de estos datos, la información relativa al tráfico de pago que se indica para cada par de ciudades es el total combinado de las líneas aéreas que notifican. Dichos datos consisten en el número de pasajeros y de las toneladas de mercancías y correo. Los datos correspondientes a las toneladas de mercancías y correo se indican con dos decimales. Para mayor información respecto a la manera de disponer los datos, véase la sección "Presentación de los datos", párrafos 8 a 11 de esta Introducción.

5. Para cada par de ciudades, se indican las líneas aéreas incluidas en los totales de tráfico de pago. En la compilación correspondiente al cuarto trimestre de 1986, se han analizado los datos correspondientes a 120 líneas aéreas internacionales regulares de 81 Estados contratantes. Estas líneas aéreas notificaron 11 616 datos de pares de ciudades individuales unidas por servicios internacionales regulares. De este total se excluyeron 5 629 datos por tratarse de pares de ciudades notificadas por una sola línea aérea. Los restantes (5 987 datos) se combinaron para obtener los datos sobre el tráfico de los 2 341 pares de ciudades que se incluyen en este Compendio.

IDIOMAS

6. El índice (página I), la introducción, la lista de designadores de líneas aéreas y el facsímil del formulario B de información de transporte aéreo se dan en español, francés, inglés y ruso en la sección azul.

7. Los encabezamientos de las tablas y columnas aparecen en las tablas del Compendio sólo en inglés, pero al final de esta Introducción, figuran sus equivalentes en español.

PRESENTACION DE LOS DATOS

8. La información que contiene este Compendio se da por orden alfabético según los pares de ciudades. El tráfico de pago (pasajeros, mercancías y correo) aparece de acuerdo con el sentido en que se efectuó el servicio (por ejemplo, para saber el tráfico en ambas direcciones entre Río de Janeiro y Tokio, el total correspondiente a Río de Janeiro-Tokio, que aparece en R, debería agregarse al de Tokio-Río de Janeiro, mencionado en I).

9. Debido a las limitaciones de espacio, no se han empleado más de quince letras para componer los nombres de las ciudades, pero se ha tenido cuidado en reflejar en las quince letras el nombre completo de la ciudad. En general, cuando se ha utilizado un nombre abreviado para una ciudad, la abreviatura altera el final del nombre, con el objeto de que la ciudad ocupe el verdadero lugar que le corresponde en orden alfabético.

10. En cada par de ciudades, las líneas aéreas cuyos datos aparecen en los totales de tráfico de pago indicados, han sido identificadas por medio de los designadores de dos letras de la OACI, de uso general en la industria aeronáutica. En la página XVIII se da una lista alfabética de estos designadores, junto con la abreviatura correspondiente a la línea aérea, su denominación completa y estado de matrícula, y se indica si la línea aérea ha notificado para el presente período.

11. En el interior de la cubierta posterior figuran las notas y explicaciones de los signos convencionales utilizados en los Compendios Estadísticos de la OACI.

ORIGEN Y DESTINO POR VUELO

Servicios regulares (de pago) - Operaciones internacionales

Período:

PAR DE CIUDADES	PASAJEROS (Número)	MERCANCIAS (Toneladas)	CORREO (Toneladas)	TOTAL DE LINEAS AEREAS COMPRENDIDAS
				Cada línea aérea notificó el tráfico de las tres columnas, a menos que la clave de la línea aérea esté acompañada de uno de los siguientes números: 1 - no notificó pasajeros 2 - no notificó mercancías 3 - no notificó correo

FORMULARIO B

ВВЕДЕНИЕОБЩИЕ ПОЛОЖЕНИЯ

1. Первая часть (белые страницы) настоящего сборника статистических данных по начальным и конечным пунктам (OFOD) содержит статистические данные за четвертый квартал 1986 года, а вторая часть (желтые страницы) содержит статистические данные за двенадцатимесячный период, заканчивающийся 31 декабря 1986 года. В период с 1977 по 1981 год сбор данных OFOD осуществлялся на экспериментальной основе отдельно за март, июнь, сентябрь и декабрь каждого года. Начиная с 1982 года, эти данные собираются и публикуются один раз в квартал, и в каждом выпуске содержатся сводные данные за три месяца квартала.

ОБЕСПЕЧЕНИЕ КОНФИДЕНЦИАЛЬНОСТИ ДАННЫХ

2. Статистические данные, издаваемые в этом сборнике, сообщались в ИКАО по форме отчетности по воздушному транспорту В (Начальный и конечный пункты полета), которая приведена на стр. XVI и XVII. Совет ИКАО указал, что ИКАО должна обеспечивать конфиденциальность данных, представляемых по этой форме по каждому государству и каждой авиакомпании, и что ИКАО может опубликовать и предавать гласности только те статистические данные, которые не отражают перевозок отдельных авиакомпаний. Практическим последствием этой политики является то, что статистические данные для пары городов не публикуются в этом сборнике (или могут иметься в каком-либо другом виде), если по крайней мере две авиакомпании, представляющие два различных государства, не сообщили свои данные.

СОДЕРЖАНИЕ СБОРНИКА

3. В данном статистическом сборнике содержатся данные о коммерческих перевозках, выполненных авиакомпаниями, осуществляющими регулярные международные перевозки. Данные приведены в соответствии с определениями перевозок между начальными и конечными пунктами следующим образом: коммерческие перевозки для данного рейса (т.е. полеты воздушного судна по этапу или ряду этапов с неизменяемым номером рейса), подразделенные по парам городов в соответствии с пунктом посадки и пунктом высадки. Поэтому основой приведения данных, содержащихся в настоящем сборнике, является пара городов, которая определена как "пара городов, полет между которыми предусмотрен в пассажирском билете или части билета, или между которыми перевозятся грузы в соответствии с отгрузочным документом или частью его (грузовая накладная или почтовая накладная)".

4. Ввиду конфиденциального характера данные по коммерческим перевозкам, приводимые для каждой пары городов, представляют собой совокупное общее количество для авиакомпаний, представляющих данные. Эти данные содержат количество пассажиров, груз и почту в тоннах. Данные по грузу и почте в тоннах приводятся с точностью до сотых долей. Дополнительные разъяснения в отношении того, каким образом приводятся данные, см. в разделе "Представление данных", пункты 8 - 11 настоящего введения.

5. Для каждой пары городов приводятся авиакомпании, включенные в общее количество коммерческих перевозок. Во время подготовки настоящего сборника проанализированы данные по 120 международным регулярным авиакомпаниям из 81 Договаривающегося государства за четвертый квартал 1986 года. Эти авиакомпании сообщили о 11 616 случаях или отдельных пар городов, связанных международными регулярными перевозками. Из общего количества 5629 случаев были исключены ввиду того, что они были приведены для пары городов только одной авиакомпанией. Остальные (5987 случаев) были скомбинированы для 2341 пары городов, включенных в настоящий сборник.

ЯЗЫКИ

6. Содержание (страница 1), введение, перечень обозначений авиакомпаний и факсимиле формы отчетности В по воздушному транспорту приводятся на русском, английском, французском и испанском языках в разделе с голубыми страницами.

7. Названия таблиц и колонок даются в сборнике только на английском языке, а эквиваленты на русском языке приводятся в конце настоящего введения.

ПРЕДСТАВЛЕНИЕ ДАННЫХ

8. Информация в сборнике представлена в алфавитном порядке пар городов. Коммерческие перевозки (пассажиры, груз и почта) указываются в направлении выполнения рейса (например, для того, чтобы определить объем перевозок в обоих направлениях между Рио-де-Жанейро – Токио, которые приводятся под итоговые данные по направлению Рио-де-Жанейро-Токио, которые приводятся под рубрикой R с итоговыми данными по направлению Токио-Рио-де-Жанейро, которые приводятся под рубрикой T).

9. Ввиду ограниченного пространства при указании названия городов пришлось ограничиться пятнадцатью печатными знаками, но были приложены все усилия для того, чтобы с помощью этих 15 знаков указать полное наименование города. В целом, если используется сокращенное название города, такое сокращение используется только для окончания названия с тем, чтобы дать городу соответствующее место в алфавитном порядке.

10. Для каждой пары городов авиакомпании, данные по которым включены в общее количество коммерческих перевозок, обозначаются в сокращенной форме ИКАО с помощью двух букв, которые обычно используются в авиации. Алфавитный перечень этих обозначений вместе с сокращенным названием авиакомпаний, полным названием авиакомпаний, государством регистрации и сведениями с тем, сообщала ли авиакомпания данные или нет, приводится на странице XVIII.

11. Примечания и объяснение статистических условных знаков и обозначений, используемых в статистических сборниках ИКАО, приводятся на внутренней части задней стороны обложки.

НАЧАЛЬНЫЙ И КОНЕЧНЫЙ ПУНКТЫ ПОЛЕТА

Регулярные перевозки (комерческие) и международные полеты

Период времени:

ПАРА ГОРОДОВ	ПАССАЖИРЫ (число)	ГРУЗ (тонны)	ПОЧТА (тонны)	VKЛЮЧЕННЫЕ АВИАКОМПАНИИ (ОВЩЕЕ КОЛИЧЕСТВО)
				Каждая авиакомпания приводит данные по всем трем видам перевозок, если не имеется следующей цифры после кодового обозначения авиакомпаний: 1 – данные по пассажирам не приводятся 2 – данные по грузам не приводятся 3 – данные по почте не приводятся

ФОРМА В

Примечания (включая упоминание любого неизбежного отклонения от инструкций):

**ФОРМА В
(НАЧАЛЬНЫЙ И КОНЕЧНЫЙ ПУНКТЫ ПОЛЕТА) ИНСТРУКЦИЯ ПО ЗАПОЛНЕНИЮ ФОРМЫ**

ПРАВИЛА ЗАПОЛНЕНИЯ

Данная форма заполняется ежеквартально Договоризированной государствами ИКАО по всем авиакомпаниям, выполняющим международные регулярные авиаперевозки. В каждой форме следует включать следованные данные за три месяца квартала. Формы следует передавать в ИКАО не позже, чем через 2 месяца по истечении указанного периода представления отчетности.

Примечание. Форма С, озаглавленная "Перевозки по этапам полета", заполняется ежегодно и состоит из сведений о международных воздушных перевозках по этапам полета.

ОБЕСПЕЧЕНИЕ КОНФИДЕНЦИАЛЬНОСТИ ДАННЫХ

Совет ИКАО указал, что ИКАО должна обеспечивать конфиденциальность данных, представляемых по этой форме по каждому государству и каждой авиакомпании, и что ИКАО может опубликовать и предпринять гласности только те статистические данные, которые не отражают перевозок отдельных авиакомпаний.

Названия отдельных авиакомпаний должны приводиться только в верхней части заполняемой формы В-Х, а в формах, получаемых с помощью печатного устройства ЭИА, названия авиакомпаний должны приводиться лишь в верхней части первой страницы каждой формы.

При направлении этой информации в ИКАО по почте рекомендуется помешать оттиск в запечатанный конверт с надписью "Вскрываются только сотрудниками ИКАО по вопросу перевозок". Этот конверт может быть затем помещен в простой конверт и направлен в ИКАО обычным способом.

СТАТИСТИЧЕСКИЕ ДАННЫЕ ДЛЯ ОТЧЕТА

В настоящую форму заносятся данные о коммерческих перевозках (пассажиры, груз, почта), выполненных между всеми международными парами городов, регулярные коммерческие перевозки между которыми осуществляются авиакомпаниями, зарегистрированными в государстве, представляющим данные. Данные о коммерческих перевозках между внутренними парами городов представляются нет необходимости.

Примечание. Эта форма отчетности может быть использована двояким образом. Во-первых, она может быть использована государством для представления данных о международных перевозках одной авиакомпанией, которая является предпочтительной, если для этого существует возможность (см. пример А ниже). Во-вторых, при необходимости государство может использовать эту форму для представления сведений данных о международных перевозках нескольких своих авиакомпаний. Это требует измененной процедуры представления данных, описание которой приводится ниже в специальной инструкции.

Специальная инструкция для форм, содержащих сведения данные по нескольким авиакомпаниям

В правой стороне верхней части этой формы перечисляются авиакомпании, включенные в форму, при этом каждой авиакомпании предъявляется однозначный кодовой знак (см. пример Б). Для каждого предъявляемой компании и более авиакомпаний, следующих включать отдельное пояснение с указанием кодового номера и названия авиакомпаний. В колонке в данной форме эти кодовые номера должны указываться для каждой пары городов с тем, чтобы можно было определить, какие авиакомпании включены в каждый сеансовый показатель (см. пример В ниже).

ТОЛКОВАНИЕ ТЕРИМИНОВ

Начальный и конечный пункты перевозок - коммерческие перевозки, выполненные в виде линий полета, подразделяемые на пары городов в соответствии с пунктом посадки и пунктом высадки. (В отношении пассажиров "статистические данные по начальному и конечному пунктам полета" можно считать эквивалентными "статистическим данным по пункту отправления и пункту назначения, приведенным в линейном купоне", которые могут быть определены как "пункт посадки и пункт высадки пассажиров, указанные в одном полетном купоне".)

Пары городов. Пары городов, пары между которыми предусмотрены в паспортном билете или части билета или между которыми перевозятся грузы в соответствии с отгрузочным документом или частью его (грузовая накладная или почтовая накладная).

Полет. Полетом является эксплуатация воздушного судна на одном или нескольких этапах без изменения номера рейса. (Этап: полет воздушного судна с момента взлета до момента посадки).

Полетный купон. Каждая составная часть билета, дающая право на полетирование всего полета, оказываемого пассажирским билетом.

Регулярные коммерческие перевозки. Регулярные коммерческие перевозки являются полетами, запланированными и выполняемыми в соответствии с официальным расписанием за плату, или такие регулярные или достаточно частные полеты, которые поддаются официальной систематизации и доступны для общественного пользования. Сюда также относятся дополнительные рейсы, вызванные перегрузкой регулярных рейсов.

СОДЕРЖАНИЕ КОЛОНК

В колонках с 1 по 4 этой формы отчетности должны указываться следующие статистические данные:

Пары городов (колонка 5)

В алфавитном порядке перечисляются все пары городов, обслуживаемые авиакомпанией в течение квартала, за который были собраны данные о

фактических коммерческих перевозках (пассажиры, груз и/или почта) (см. пример заполнения формы ниже):

- каждая пара городов должна перечисляться дважды: сначала в одном направлении, а затем - в обратном (см. пример ниже);
- пара городов, по которым указываются данные о перевозках с фактическими отклонениями от маршрута, предусмотренного расписанием, должна включаться пометкой звездочки;
- данные о перевозках, выполненных между идентичными парами городов в ходе двух или более рейсов, могут объединяться (таким образом, чтобы данные, приведенные на одной строке в этой форме, охватывали все перевозки, выполненные авиакомпанией между идентичными парами городов за рассматриваемый квартал).

Примечание. Вместо казавшихся городов можно использовать в этой колонке условие обозначения пунктов, принятые в ИАТА (трехбуквенные коды).

Коммерческие пассажирские перевозки (колонка б)

Охватывают пассажиров, перевозка которых производится за плату, за исключением тех, кто платит за билет менее 25 процентов обычной стоимости билета.

Коммерческие перевозки грузов - тонны (колонка с)

Грузы включают срочный и дипломатический багаж, за исключением багажа пассажиров.

Коммерческие почтовые перевозки - тонны (колонка d)

Почтовые отправления и другие предметы, сданы и предназначенные для доставки почтовому ведомству.

Примечание. Понятие "коммерческие" относится к отгрузкам, за которые получается вознаграждение. Данные о грузах и почтовых перевозках должны представляться в метрических тоннах, с точностью до третьего десятичного знака.

ОСОБЫЕ УСЛОВИЯ

Авиаперевозки на объединенных началах

Каждая авиакомпания, участвующая в авиаперевозках на объединенных началах, сообщает данные о коммерческих перевозках (пассажиры, груз и почта), выполненных ею при осуществлении полетов, а не до этого авиакомпанией в общем объеме перевозок, выполненных на объединенных началах.

Арендованные, зафрахтованные или обменные воздушные суда

Данные о коммерческих перевозках, выполненных на арендованных, зафрахтованных или обмененных воздушных судах, должны представляться в них не в отношении владельцев данных воздушных судов, а авиакомпаний, которая арендует или фрахтует эти воздушные суда и на линиях которых они используются.

Блок-чартерные перевозки

Статистические данные, относящиеся к блок-чартерным перевозкам (когда все воздушное судно зафрахтовано для чартерных перевозок на основе регулярных полетов, которые однаково выполняются как чартерные полеты по той же самой или сходным маршрутам и расписанием), считаются данными о нерегулярных перевозках и поэтому в данной форме не включаются.

Соглашения о блокировании мест

В случае, если авиакомпания закупает часть мест на рейсе (рейсах) другого авиакомпания, зафрахтованного для выполнения этих мест для собственного пользования, то авиакомпания, закупающая места, должна представить данные о коммерческих перевозках, которые она предлагает. Аналогичным образом, авиакомпания, предлагающая такие места, должна сообщать данные об остальной части выполненных коммерческих перевозок.

СИСТЕМА ИЗМЕРЕНИЙ

Данные о весе сообщаются в метрической системе. Количество тонн в колонках **г** и **д** следует приводить с точностью до трех десятичных знаков.

КОЭФФИЦИЕНТЫ ПЕРЕВОДА (из системы фут/фунт в метрическую систему):

1 короткая тонна (2000 фунтов) = 0,9072 тонны

1 длинная тонна (2240 фунтов) = 1,0160 тонны

ОБОЗНАЧЕНИЯ, УПОТРЕБЛЯЕМЫЕ ПРИ ЗАПОЛНЕНИИ ДАННОЙ ФОРМЫ

Пожалуйста, пользуйтесь следующими обозначениями при заполнении данной формы:

X Отклонение от расписания.

- Величина, равная нулю.

-- Неприменимая категория.

--- Данных не имеется.

ПРИМЕРЫ ЗАПОЛНЕНИЯ ФОРМЫ

Пример А. Отчет по отдельной авиакомпании

NOTES AND SYMBOLS

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of ICAO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers, or boundaries.

The metric system is used throughout.

A space has been left to separate thousands.

Decimal figures are always preceded by a period (.).

The following symbols are used throughout this Digest:

0. Magnitude less than half the unit value of the last digit shown.
 - Magnitude nil.
 - Category not applicable.
 - Data not available.

NOTAS Y SIMBOLOS

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la OACI, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o áreas, o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Se emplea exclusivamente el sistema métrico decimal.

Se ha dejado un espacio para separar los millares.

Las cifras decimales van siempre precedidas de un punto (.).

Se emplean los símbolos siguientes en el presente Compendio:

0. Magnitud menor que la mitad del valor de la unidad del último dígito indicado.
 - Magnitud cero.
 - Categoría no aplicable.
 - Datos no disponibles.

ANNOTATIONS ET SYMBOLES

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part de l'OACI aucune prise de position quant au statut juridique de pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Le système métrique est utilisé dans le présent recueil.

Les tranches de mille sont séparées par un espace.

Les décimales sont toujours précédées d'un point (.).

Les symboles suivants sont utilisés dans le présent recueil :

0. Valeur inférieure à la moitié de la valeur unitaire du dernier chiffre indiqué.
 - Valeur nulle.
 - Catégorie non applicable.
 - Chiffres inconnus.

ПРИМЕЧАНИЯ И УСЛОВНЫЕ ОБОЗНАЧЕНИЯ

Употребляемые в данной публикации обозначения и подача материала никоим образом не означает выражение каких-либо мнений со стороны ИКАО относительно юридического статуса какой-либо страны, территории, города или района, или их властей, или же делимитации их границ или разграничительных линий.

Везде используется метрическая система.

Место оставлено, чтобы отделить тысячи.

Десятичным цифрам всегда предшествует знак «точка» (.).

В этом сборнике везде используются следующие условные обозначения:

0. Величина, значение которой составляет менее половины значения последней указанной цифры единицы измерения.
 - Величина, равная нулю.
 - Неприменимая категория.
 - Данных не имеется.

Orders for this publication should be sent to one of the following addresses, together with the appropriate remittance (by bank draft or post office money order) in U.S. dollars or the currency of the country in which the order is placed:

Envoyer les commandes aux adresses suivantes en y joignant le montant correspondant (par chèque bancaire ou mandat-poste) en dollars des États-Unis ou dans la monnaie du pays d'achat :

Los pedidos deben dirigirse a las direcciones siguientes junto con la correspondiente remesa (por giro bancario o postal) en dólares de los E.U.A. o en la moneda del país de compra:

The tables in this Digest, except Section A, are also available in computer tape form from ICAO, Montreal, at a cost of U.S. \$200.00 including necessary documentation and airmail charges. Details on tape formats may be obtained from the Statistics Section at the ICAO Montreal address or by telephone (514) 286-6292 or telex number 05-24513.

Les tableaux du présent recueil de statistiques, à l'exclusion des tableaux de la Section A, sont également disponibles sous la forme de bande pour ordinateur au prix de 200 dollars É.-U., y compris la documentation nécessaire et la taxe d'envoi-avion. On peut obtenir des renseignements sur les formats de bande en s'adressant à la Section des statistiques de l'OACI, à Montréal, par écrit, par téléphone (514) 286-6292 ou par télex 05-24513.

Las tablas de este Compendio, salvo las de la Sección A, pueden también adquirirse en la OACI en cinta de computadora al precio de \$E.U.A. 200 en el que está comprendido la documentación necesaria y el franqueo por vía aérea. Pueden obtenerse detalles sobre el formato de las cintas dirigiéndose a la Sección de Estadística, dirección de la OACI en Montreal, por teléfono: (514) 286-6292, o por télex: 05-24513.

Таблицы, содержащиеся в данном Сборнике, за исключением раздела А, предоставляются также в форме лент электронно-вычислительных устройств в ИКАО, Монреаль, по цене 200 долларов США, включая стоимость необходимой документации и пересылки авиапочтой. Информацию о формате лент можно получить в Секции статистики ИКАО в Монреале, по телефону (514) 286-6292 или с помощью телекса номер 05-24513.
